To Whom It May Concern:

I am writing in support of the petition to require a safety warning label on Calvin Klein's fragrance "Eternity."

I have severe occupational asthma which can be (and frequently is) triggered by commercial fragrance products. I deserve to know when the ingredients of a personal care product pose a threat to my health. Please require adequate labeling of "Eternity" and any other fragranced products containing ingredients of questionable safety or known toxicity.

Thank you.

Sincerely, .
